

## Young Scientist Financial Support

**Financial support** for talented graduate students and postdoctoral fellows is a traditional part of Water Conference. The year 2024 is no exception.

We are encouraging young people to come, hear, and rub shoulders with the leaders in the field by **offering to partially defray travel and lodging costs** for selected students and postdocs who plan to present a poster at the conference. The authors of selected works will also have their registration fee waived.

This program is designed primarily for people 35 and younger. The selected candidates are required to present a poster at the meeting and take part in the Poster Competition. **An award will be given for the best poster; and the author will have an opportunity to deliver a 15-minute talk.**

To apply for financial support, please submit the following documents to [info@waterconf.org](mailto:info@waterconf.org):

1. A title and an abstract (1-2 pages) of the poster you intend to present
2. Recommendation letter - a brief note from your academic advisor describing your capabilities and the need for financial support
3. A copy of any ID that contains information of your birthdate

The deadline for application submission is **June, 30th, 2024**. Early applications are encouraged.

Applicants will be informed of decisions on or before August, 15th, 2024. **In no case can full costs be covered.** We have limited funds, so we can only partially defray travel costs for the selected candidates.

For all questions, please contact [info@waterconf.org](mailto:info@waterconf.org)
